Lok ma mito lotino kwan gi nge maber wabene gin
ma mito gitim maber wagi yoo ma mito lonyodo
omede gi miyo kony bot latin kwan ne gi ganag.

Gin ma ngec me pwonye man tito:

Ngec me pwonye man cungo pi gin ma pir gi tego ma latin ni myero onge dok bene otwer timone i Leb Munu ki Tic Ki Nama (Math) i AGIKI pa mwaka me gang kwan. Gin ma gitero apwonya pi kare mo ni konyo wegi gang ki lopwonye pi ngeyo awene ma nongo latin mito kony ameda nyo awene ma nongo gimito jami apwonya ma tek manok botgi.

Lonyodo kono giromo timo ngo?

Tye jami mapol ma iromo timo me konyo pwonye pa latinni dok pi konyo en pi tere pi kwo mere me anyim. Magi aye gin mogo manok ma weko latin pwonyo:

1. Wek latin onge nia kwan pire tek boti. Nyut bote nia kwan aye gin ducu dok en acaki gero kwo ma ber.
2. Wek gang kwan obedi anyim bot gin ducu, wek latin ni oo i gang kwan iwang cawa kikome ceng ducu.
3. Notte ki lopwony wa lotic mukene me gang kwan kun inyutu woro ki gin bene.
4. Mii kare pi loc ken, wek latin ni obal kun bene oye me kwanyo twero dok ngut pi balle.
5. Lok ki latin ni pi gin ma timme i gang kwan.
6. Lok ki lapwony pa latinni me neno nia latin ni tye ka mede maber idye mwaka.
7. Bed tye i kacokke pa lonyodo ki lopwonye ki gin mogo ma pat me gang kwan ka twere.
8. Itye ki twero me ngeyo kit ma latin ni timo kwede. Pe ibed ki akalakala pi penyoy peny ka itye ki peny.

Lok ki Lapwony pa Latin ni

Pire tek me lok ki lapwony pa latin ni nyo gang kwan kare ki kare kit ma pwonye pa latin ni tye ka wot kwede i wit pwonye ma giyubo me atima. Magi aye penyonyo wit jami mogo ma wuromo nyamo ne:

- Kwan ki i ngec me pwonye man ka ipeny ka kwene ma latin ni tye maber iye ki kakwene ma en mito gicwak kore iye.
- Me medo ikom wit pwony ma giyubo i buk man, tye wit pwonye mogo ma gitero ma mito latin ni opwony maber.
- Peny lanyut me tic pa latin ni ka ipeny bene ka en tye kacobo gin ma giyubo bote apwonya pi kare ma opore.
- Peny kit ma gipimo ki dongo pa latinni iyoo me pwony pi mwaka.
- Peny ka latin ni tye iyo ma rwatte ki cobo miti me pwonye ma pore ki ot kalac mamere. Ka peke ci peny kony ngo ma gang kwan miyo? Ngo kono ma myero in itim ki I gang?
- Peny ka latin ni tye i ka ma myero en obed iye nyo en okato malo. Ka kono en okato ci ngo mukene ma gang kwan romo miyo ne? Ngo kono ma myero atim ki i gang?

Lok ki Latin ni

“Nino peri tin owoto nining i gang kwan?”

“Ber.”

“Itimo ngo?”

“Gin mo peke.”

Man winye calo gin ma time jwi? Eno ni ber, mede ki peny! Lotino kwan ma lonyodo gi loko kwedgi lok kom gang kwan gitimo maber i gang kwan. Kany aye yoo mukene ma iromo lok kwede ki latin ni dok I konyo gin pi timo maber:

- Yub kare me lok ki latin ni pi gang kwan nino ducu.
- Peny latin ni pi nyutu gin acel ma en opwonyo tin. Ngo ma latin ni tamo nia oyomo iye totwal? Ngo kono ma nen cal tek?
- Kwan waraga ki tic mogo ma latin ni kelo i gang. Wek latin ni onyut boti kit pwoy ngo ma gino enoni nyutu.
- Pwo latin ni pi tic ki tuti matek “pe pi lagam mabeco keken.”
- Peny ngo ma latin ni tamo. Ingeyo enoni nining? Itamo ningo? Iniango ngo? Itimo iyoo meno pingo? Tye yoo mo me nongo lagam enoni?

Konyo Pwoy Cen Ki I Gang Kwan

Pwonye pe myero ogiki ka latin oweko gang kwan. Lotino kwan gitiyo ki wang cawa madwong woko ki i gang kwan loyo me gang kwan. Magi aye yoo ma iromo konyo pwonye pa latin ni woko ki i gang kwan:

- Cwak kor latin ni me kwano buk, kwan ki latin ni, ka dok bene nyib kare me kwan pa dano ducu me i gang — i leb mo keken ma inongo yot boti.
- Yub ka mober labong woo pi latin ni me timo tic ma gimiyi ki i gang kwan nyo tic mo keken me pwonye.
- Temme me yubo wang cawa marom nino ducu me timo tic me gang kwan.
- Tii kibuk man me nyuto ngec me pwonye pi neno nia itiyi iwit pwony mogo ma opore.

Ngo ma latin ni myero onge nyo orom timo ne i leb munu

Leb

- Tito lok ki diro bot lowiny en ma patpat dok bene pi tyen lok ma papat ma calo, nyuto tam mere i ngec ma en okwano i bul nyo cwako tam me gin mo ma pire tek bote. Dok bene timo alokaloka ma opore pi lowiny en ki gin ma en tye ka lok iye. Tiyo bene ki leb iyo ma calo tuku kun nongo kom lok.
- Tito wit lok madongodongo inge nyamo lok. *Labol ne – lotino kwan ginyamo lok pa Dr. Martin Luther King Jr. malubu jemo pa lwak pi gin ma gimito ki bot gamente, ci dong gi nyutu witte madongo i coc inge nyamo lok enoni.*

Kwan ki Cik Kwaro Acoya

- Tito theme, ma en aye cwiny ma oweko coc menu menu me lok goba pi poro fin adaa (nonfiction) ma tye i wii lacoc (fiction) i kwo otimme.
- Poko kit ma dano ma ginyutu gin i buk ka coyo niang mamere pi kit ma gilok kwede I wit coc ma pat pat ma calo wer longo, coc pi kwo pa ngat mo nyo tuku ma giketo i coc.

- Coyo ododo ki wit coc mogo ma tinotino kun tito matut ikom dano ma en oketo I coc mere, kare ma odod enoni otimme iye, kit ma gicango ki pako mogo ma otimme.

Yoo me Nicwaki Kor Pwonye I leb Munu I Gang

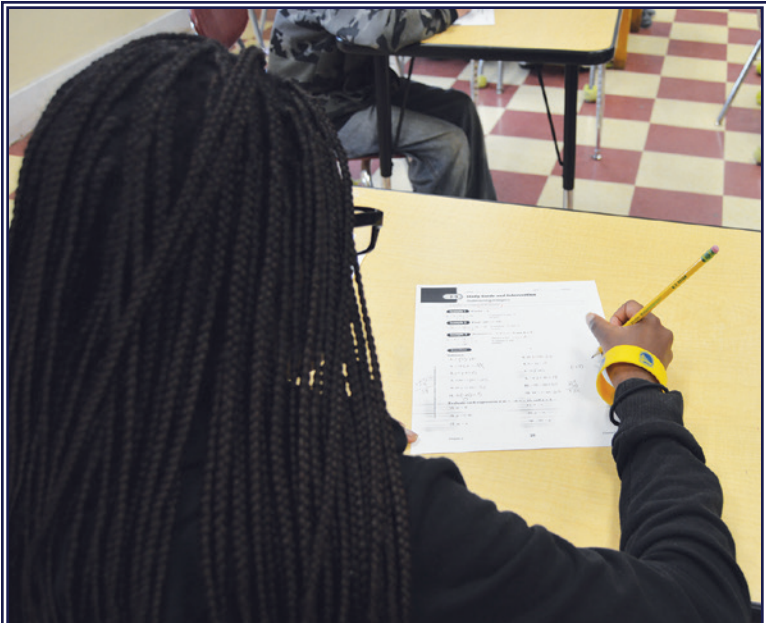

- Kacel wukwan buk aryo ma patpat me kare ma patpat kun ma gilok i kom gin marom. Penyi penyi ma jolo tamo madwo penyi ma calo penyi penyi ma calo, “Ineno ningo i kom _____?” “Itamo ningo i kom _____?”
- Teme me nyibo latin ni wek okwan buk ma keto en ka tamo jamo ma patpat ma en maro nyo tamo iye matut macalogangi kwan ma malo nyo kwo me tic.
- Yubi nino me limo gangi kwan ma malo ma tye i gang kal me Portland kacel ki latin ni ka wunyam kwede ngo ma en geno me winyone ki gangi kwan mego ma malo. Wulok kwede kit wit kwan ngo ma en mito oter ki gang kwan mere ma kombedi en tye iye ni pi konyo en me yubi I kwan pere ma malo dok pi tic bene.

Ngec me poyo wic:

Nen nia bene i lok ki lapwony pa latin ni ka ipeny ngo ma giromo konyi kwede pi yub me mede ki pwonyo leb munu i gang ma kun rwatte ki yub me pwonye gi me kwan ki coc i gang kwan.

Ngo Ma latin kwan ni myero onge nyo otwer timo ne i tic ki nama (Math)

- Ngii ki latinni kit me nongo square roots ka wutem kit dongo ngec me tic ki nama ma gilwongo nia irrational numbers ma calo π ma pe giromo coyo dok fraction.
- Tii ki distributive property calo ($2 \times [1 + 3] = [2 \times 1] + [2 \times 3]$) ka commutative property calo ($2 + 3 = 3 + 2$) me nyuto nia equations aro girom.
- Nyaa niang i kom functions ki kit ma ginyutu kwede i equations, graphs, ki tables ka itii kwede iyo ma pat.
- Tem ngiyo exponential relationships, ki t ma nama mo dongo nyo mede kwede i increasing rate ma pat ki constant rate. *Labol ne – i nama ma girweyo 2, 4, 8, 16, 32, 64 nama acel acel mayen dit wang aro ki bot me anyim ne.*
- Tii ki nama pi lines ki curves. Niang kit ma equations an ki inequalities romo konyo kit me nongo lagam i ayela.
- Ngiye maber ka itii ki Pythagorean Theorem me nongo boro pa hypotenuse i right triangle.
- Nong yoo me nongo lac pa squares gidor i grids.
- Nong boro pa line segments ma pat pat.
- Nong yoo me guro ki ngiyo data pi niango ngo ma en titu.
- Yee me niango wat ma tye i kin data wek omii boti niye nia me nongo lagam I lapeny ma acaki.

Pwonyo Tic ki Nama (Math) I Gang

- Lok bot latin ni pi algebra wa ki kit ma gitiyo kwede i kwo.
- Peny latin ni kit ma lotic ma calo lotic ki bau carpenters, logeto madongo architects, nyo lodwa deke pilots gitiyo kwede ki Pythagorean Theorem i tic gi.
- Wunen ki latin ni kit ma gitiyo kwede ki data i magazines, newspapers, nyo TV. Loki i kit ma giromo guro ki data pi nyuto ngec me math i tables ki graphs.
- Cim labol me ngec mogo ma ginyutu i graph ka ipeny latin ngec ngo ma en oniango ki iye.

Ngec me poyo wic:

Walego bene nia i lok ki lapwony pa latin ni ka ipeny gin ma giromo konyi i gang pi konyo pwonye i yub gang kwan gi i yoo ma lubo tic ki nama (math).
