

December 4, 2020

Dear Lyman Moore Middle School Students and Families,

This letter is to inform you that another individual associated with Lyman Moore Middle School recently tested positive for Coronavirus Disease 2019 (COVID-19) due to exposure outside of school. We are informing all students and families out of an abundance of caution as this individual has not been at school during their infectious period and there has been no exposure within the school community.

Additionally, since the timing of this case aligns with the other recent cases at Moore, we are still currently on track to return to in-person learning on Tuesday December 8th. We will continue to closely monitor the situation and update the community as necessary.

Due to privacy laws regarding health status, we are not able to disclose more specific information about the individuals that have tested positive (such as their role, grade level they're associated with, etc.). However, please know that we are following our local and state protocols to ensure health and safety for our school community. These protocols include the following:

- Maine CDC or a school representative will contact you directly if you are identified as a close contact of someone who tested positive. Close contacts must quarantine for 14 days from their last known date of exposure. Testing for close contacts is recommended 5-7 days from exposure. Close contacts must quarantine for the full 14 days, even if their test result is negative. Secondary contacts of "close contacts", such as family members, can continue to go to work and school, as long as the quarantined person does not have symptoms or a positive test.
- Close contacts in schools are determined by the classroom configurations. This typically means that students within a given cohort along with the staff that interacted with them are close contacts. Other possible exposures (i.e., buses, after school programs, etc.) are also evaluated. Individuals who have been within six feet for more than 15 minutes are also considered to be close contacts.
- Deep cleaning of the spaces will take place after any known cases emerge. As this individual was not present during their infectious period, there is no additional cleaning necessary, and we will continue our regular cleaning and disinfecting protocols.
- Testing is available for any symptomatic students or staff through our partnership with Greater Portland Health. If we were in a situation where a large number of students or staff needed testing because of an exposure, we have a relationship with Northern Light to provide testing for non-symptomatic students and staff. Non-symptomatic individuals can also obtain testing through their providers. You can locate a convenient to you testing site here. In general, these testing sites will bill your insurance and you will not have any out-of-pocket or copays as a result. If you encounter any hardship in procuring testing, please let your school nurse know.

Additional details about our protocols can be found here on our reopening website (<https://bit.ly/37TRSvu>).

PORTLAND PUBLIC SCHOOLS

prepared & empowered

We are hoping for the speedy recovery of our community members, and we are taking every precaution to maintain safe and healthy learning environments. Feel free to reach out to principal Ben Donaldson or school nurse Molly Small if you have additional questions. Please remember to keep your children home if they have symptoms, wear your masks, practice good hand hygiene, and maintain physical distancing!

Sincerely,

Aaron Townsend
Assistant Superintendent of School Management
